ABSTRACT

Chapter 1: deals with the study of the development of physical planning policies in England, U.S.A., the former Soviet union, the Republic of China and the Arab Republic of Egypt since the emergence of the economic system of these countries up to the early nineties.

The study encompasses and exposition of the physical planning policies in its various stages of development, and its impact on the establishment of the organization dealing with physical planning on the various national, regional and local levels of the each stage.

Chapter 2: Is a study of the logic philosophy thought and style of the pioneers and planners and their intellectuals, and the recommendations of the planning authorities affecting the educational process of planning in the stage of the development of physical planning policies of such countries.

Chapter 3: is a study of the development of the educational process of physical planning in universities and high institutions together with an analysis of the educational syllabi of each stage during the development of the policies and physical planning idea (concepts) in the fore-mentioned countries.

Chapter 4: deals with a comparison between the countries, this includes a comparison of the impact of the policies and concept of planning and of the relationship between educational process with the role of the authorities dealing with planning in its various levels.

Chapter 5: is a summary of the fore-mentioned study and its output (conclusions) together with the recommendations related to the education syllabi of planning in Egypt, based on the mutual impact between these syllabi and the physical planning activity in its various levels.
